## **DETAILED ACTION**

### ***Continued Examination Under 37 CFR 1.114***

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on February 9, 2009 has been entered.

### ***Response to Arguments***

Applicant's arguments filed February 9, 2009 have been considered. Reference is made to the interview of January 26, 2009. In view of the arguments and the interview, Applicant's amendment overcomes the rejection of claims 76-79 under 35 U.S.C. 103(a) over Korhonen et al (US 6,994,771) in view of Laapotti (US 6,103,066), and of claims 76 and 79 under 35 U.S.C. 103(a) over Hamalainen et al (WO 02/072952) in view of Eljoki et al (US 5,756,156), both set forth previously.

***Allowable Subject Matter***

Claims 71-79 are allowed

The following is an examiner's statement of reasons for allowance:

Claims 71-75 are allowed, because in a surface sizing apparatus for a paper or board web comprising a turning roll for the web and an applicator for applying surface size to the side of the web facing away from the turning roll, the prior art does not disclose or suggest arranging a vacuum nozzle after the turning roll and positioning the surface size applicator after the vacuum nozzle. In this arrangement, air is sucked from the web and a vacuum is formed in the inner pores of the web prior to surface sizing.

Claims 76-78 are allowed, because in a method of applying surface size to at least one side of a paper web with a spray coater, the prior art does not disclose or suggest guiding an unsupported paper web past a spray coater and spraying a size solution onto a first side of the web, and then guiding the unsupported web around a vacuum roll and applying a vacuum of between 5 and 80 kPa to the opposite side thereof. In this arrangement, size solution applied on the first side of an unsupported web is sucked into the inner pores of the web. Claim 79 is similarly allowed, for performing the spraying and vacuum application steps of claim 76 simultaneously rather than sequentially.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Eric Hug whose telephone number is (571) 272-1192.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Steven Griffin can be reached on 571 272-1189. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
